Designed for Agricultural Applications

Nov 2018 Newsletter

2018 has shown us many NEW INNOVATIVE products

The Overdrive ODMR0210 dimmer has been one of BEST SELLERS this year. With the Master, Slave, Manual Mode control and 2 channel controls, this units is designed around the Overdrive 6 and 10 watt lamp characteristics.

The 2 channel 5 amp model will control

166 – 6 watt LED

100 – 10 watt LED's per dimmer

The 2 channel 10 amp model will control

330 – 6 watt LED's

200 – 10 watt LED's per dimmer.

The best part of this new model is the PRICE!!!! Call us if you haven't had a chance to test it out yet. Our latest model has a larger wiring box for a neat, clean look with no exposed wires. This dimmer uses MOSFET technology and accurately controls the Overdrive LED's from 100 percent to 0.

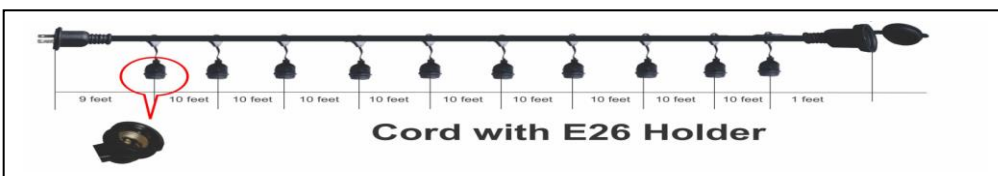

Another new revolutionary model is the **Overdrive 20W H80** – Non-Dim High Wattage CFL replacement. Using only 20 watts, as compared to 40 or 55 watt CFL's. 2700 lumens. A perfect brood light bulb. **5000K and 3000K color both in stock.** Directional beam angled lens, just like our 6/10 watt poultry LED's.

All NEW Overdrive 6 and 10 watt directional beam angled LED's are now WET LOCATION UL rated.

If you haven't seen our Cord sets – ask us about them. Great way to place lights where you want them

and no need for a contractor. Models come in 100' sections and offer 10 water proof sockets (sockets paced on 10' center).
